

INTEGRATED MANAGEMENT SYSTEM POLICY

SZTR KORD2 specializes in the production of rubber and metal products. SZTR KORD2 operates with the vision of constantly improving its work in accordance with legal regulations, technical regulations, good professional practice and the requirements of the ISO 9001, ISO 14001 and ISO 45001 standards.

The integrated management system policy is based on the establishment, implementation and maintenance of a market-oriented business system with the aim of fully satisfying the requirements and expectations of the customers, users and other interested parties, with a constant increase in the effectiveness and efficiency of business. Professional and trained personnel, appropriate equipment and tools were hired for the realization of this determination.

The management and employees of SZTR KORD2 through their daily practice demonstrate their commitment to the improvement of the quality of the processes for which they are responsible, to the prevention of environmental pollution, as well as to the prevention of injuries at work.

The basic principles of the integrated management system policy are:

- consistent application and continuous improvement of the quality management system, environmental protection and health and safety protection at work in accordance with the requirements of the ISO 9001, ISO 14001 and ISO 45001 standards, by conducting internal and external checks, by applying corrective and preventive measures measure, by prompt resolution of all types of observed non-conformities and regular system reviews;
- conquering new and preserving old markets, by improving the quality of its services and developing long-term partnership relations, both with suppliers and subcontractors, as well as with customers and users of services;
- high-quality execution of work duties encouraged by regular training of employees in the field of profession, environmental protection and health and safety at work;
- prevention of incidents at work by fostering safe working conditions with the use of adequate work equipment and use of prescribed means for personal protection at work and respect for ecological principles, by reducing emissions into the air, water and soil, while minimizing waste and its adequate disposal.

The management is committed to realizing the vision and basic principles of the integrated management system policy, which it reviews regularly.

All employees are directed towards the development of a culture of quality and sustainable development by fostering a positive productivist climate and responsibly performing their work tasks in accordance with the established policy of the integrated management system.

The entrepreneur is responsible for implementing the policy of the integrated management system.
